# FOREWORD

The St. Vincent and the Grenadines Port Authority (SVGPA) Statistical Digest captures data on cargo, vessel and cruise passenger activities at the country's major port facilities – Kingstown Deep Water Pier, Campden Park Container Port and Kingstown Cruise and Ferry Terminal. It includes cruise passenger arrivals in the Grenadines.

The Campden Park Container Port is the central container port and handles over 90% of all containers. The Kingstown Deep Water Pier presently handles break bulk and regional cargo.

Operating and managing various ports on different islands, SVGPA statistical data is compiled into this annual publication to offer our customers, stakeholders, and everyone with an interest in shipping, a look at the cargo throughput of the SVGPA. It is my expectation that this publication will be a valuable resource document.

As St. Vincent and the Grenadines continues to struggle with the impact of the international economic decline, cargo throughput for the year 2013 decreased by 1.72%, to a registered total of 409,437 tons, where decreases were seen in all major commodities. In 2012, a total of 416,605 tons was recorded.

In 2013, total imports decreased by 6,199 tons or 1.81%, mainly due to decrease in all cargo types imported, with the exception of vehicles and extra regional bulk cargo.

Total exports decreased by 798 tons or 1.07%, due to declines in the exportation of local produce, and containerized cargo.
